Chennai, India

Profile

Technical lead architecting and shipping production AI SaaS products at **WeCommit** — owning the full stack from agent design and backend API engineering to cloud infrastructure and cross-functional delivery. Experienced in building LangGraph-based autonomous agent systems, real-time full-stack applications, and multi-cloud deployments across AWS, Hetzner, Fly.io, and Vercel. Works across a multilingual, cross-timezone team bridging engineering with business and sales.

Work Experience

Technical Lead · Global Full Stack Engineer, WeCommit Co., Ltd. (위커밋)

Seoul, South Korea (Remote)

November 2024 – Present

- Serve as technical lead across the full product lifecycle — frontend, backend, agent architecture, DevOps, and deployment — across multiple simultaneous production SaaS products targeting global and Korean markets.
 - Architect standalone AI agent systems using LangGraph, LangChain, and Vercel AI SDK; design multi-step orchestration pipelines for document intelligence and business process automation.
 - Own cloud infrastructure across AWS, Hetzner, Fly.io, and Vercel with CI/CD pipelines built on GitHub Actions; responsible for all production deployments and environment management.
 - Engineer client-side applications in Next.js, React, Vite, and TypeScript with Tailwind CSS; build backend APIs with Python and FastAPI against MySQL and PostgreSQL databases.
 - Integrate and maintain production payment infrastructure using Paddle and Stripe — handling subscription billing, webhook event processing, and payment lifecycle management for live SaaS products.
 - Drive architectural decisions in close collaboration with business and sales teams to translate product requirements into scalable, user-facing systems.
 - Lead and mentor a multicultural, multilingual engineering team across multiple timezones.
-

Product Support Analyst, Mitsogo Technologies

Chennai, India

March 2024 – July 2024

- Provided expert technical support for the Hexnode Unified Endpoint Management (UEM) solution, troubleshooting complex issues across Android, iOS, macOS, and Windows platforms to ensure customer success.
- Achieved high customer satisfaction by delivering clear, effective solutions via chat and email, leveraging in-depth knowledge of backend configurations and device communication protocols.
- Functioned as a key point of contact for endpoint security and device management, resolving issues related to device enrollment, configuration, and security policy enforcement.
- Authored and maintained documentation for customer interactions and resolutions, contributing to the team's knowledge base and streamlining future support efforts.
- Collaborated with the development team by escalating and providing detailed analysis for complex technical issues, aiding in product improvement and bug resolution.

Education

Bachelor of Technology, Information Technology

S.A. Engineering College, Chennai (Affiliated to Anna University)

Graduated : **2023**

GPA : **8.83/10**

Academic Projects

CROSS-E: AI-Powered Image Generation Platform

- Tech Stack: *Node.js, Express.js, React.js, MongoDB, DALL-E, AWS S3, AWS CloudFront, Render*
- Developed a full-stack web application that allows users to generate, share, and download unique images by inputting text prompts.
- Engineered a community gallery where users can post, view, and interact with AI-generated art, and deployed the application using Render for the server and AWS for content delivery.

Raspberry Pi Personal Cloud Storage

- Tech Stack: *Raspberry Pi, Apache, PHP, MySQL, OpenSSL, Veracrypt*
- Built a secure, low-cost personal cloud storage solution on a Raspberry Pi as an affordable alternative to commercial services.
- Implemented multi-layered security using Veracrypt for disk encryption and protocols like OpenSSL, Twofish, and Blowfish to ensure data privacy.

- Personally developed and managed the core User Management and Backup/Recovery modules for the platform.

Inventory Management System for Retailers

- Tech Stack: *Python, IBM Cloud, Docker, Kubernetes, JavaScript, HTML/CSS*
- Led a team in developing a full-stack inventory system, overseeing the project from design to deployment.
- Engineered the backend using Python, managed databases with IBM Cloud, and integrated the system with Docker and Kubernetes for containerization.
- Implemented a dual-login portal for admins and suppliers, featuring an automated re-order system to maintain optimal stock levels.

Technical skills

- **Languages:** TypeScript, JavaScript, Python, SQL, C, C++, Java
- **Frontend:** Next.js, React, Vite, Tailwind CSS, HTML/CSS
- **Backend:** FastAPI, Node.js, Express.js, REST APIs
- **AI / Agents:** LangGraph, LangChain, Vercel AI SDK, LangSmith, OpenAI, Gemini APIs
- **Databases:** PostgreSQL, MySQL, MongoDB, pgvector
- **DevOps / Cloud:** AWS (S3, CloudFront), Hetzner, Fly.io, Vercel, GitHub Actions, Docker, Kubernetes
- **Tools:** Git, Linux, Prisma, Webhooks
- **Languages:** Tamil (native), English (fluent)
